

Can solar power power Arizona's future?

The proposals include incentives for customers who install solar energy technologies for their own homes and businesses. The Commission's Renewable Energy Standards encourage utilities to use solar, wind, biomass, biogas, geothermal and other similar technologies to generate "clean" energy to power Arizona's future.

Does Arizona have solar?

Arizona has a large capacity in home solar panels and large-scale solar facilities already in use. The state ranked fifth in the US in solar-powered energy generation in 2023 according to the US Energy Information Administration. With so much predictable sun for so much of the year, solar makes sense for many Arizonans.

What is Arizona's solar power capacity?

As of 2023, Arizona has more than 6,100 megawatts of solar-powered generating capacity from both utility- and small-scale installations, ranking it among the top five states in the nation.

How does solar billing work in Arizona?

Arizona's major utilities use net billing to charge solar customers. Under Arizona's net billing, you'll be charged the full retail rate of electricity for any energy you take from the grid. If your solar panels generate excess energy at any point, they will be purchased by your utility company at a lower rate.

What is Arizona's rank in solar-powered generating capacity?

Arizona ranks among the top five states in the nation in total solar-powered generating capacity from both utility- and small-scale installations, with more than 6,100 megawatts.

What is Arizona's energy source?

In 2023, Arizona's total in-state electricity was generated mainly from 6 sources: natural gas (46%), nuclear power (27%), coal (10%), solar energy (10%), hydroelectric power (5%), and wind (1%). In 2023, hydroelectric power plants accounted for about 5% of Arizona's total in-state electricity generation due to ongoing drought conditions.

Take back control from power companies by moving to the leading solar company in Arizona and experience a fully electric home with Omni Power. Call today for a free quote | (623) 263-1556 LEARN

Eleven Mile Solar Center is SRP's largest co-located solar and BESS project, providing power to businesses, homes and Meta's data center in Mesa, Arizona. "Solar energy paired with battery energy storage will be critical ...

The U.S. Bureau of Land Management (BLM) announced the agency has approved the 600-MW Jove Solar Project, sited on about 3,500 acres of land in La Paz County, Arizona.

By transitioning to solar power, Arizona residents can help improve air quality and create a healthier living environment for themselves and future generations. Arizona has taken steps to promote renewable energy adoption through various initiatives and policies. For example, the state has a Renewable Portfolio Standard (RPS) that requires ...
