

## What does Ark power do?

ARK Power uses the solar power plant of parent company ARK Solar Energy as its power source and provides TSMC participating suppliers and subsidiaries with services ranging from renewable energy adoption planning to power transfer, continuously moving toward the goal of a zero-carbon semiconductor supply chain.

## Who is Ark energy?

Ark Energy Corporation Pty Ltd is an Australian subsidiary of Korea Zinc Company Ltd, the world's largest zinc, lead and silver producer. Ark Energy was established to decarbonise the energy supply of the Korea Zinc group globally. The first project on this pathway - the SunHQ Hydrogen Hub - is planned to take place in North Queensland.

## Is Ark a good location for solar energy generation?

Ark said the project area is ideal for solar energy generation with an excellent solar resource and proximity to existing transmission infrastructure. "The location is well suited for solar energy generation," Ark said in its scoping report. "The land was previously used for private forestry and is relatively flat.

## Will Ark build a 500MW solar project next to Bess?

Ark, a subsidiary of Korea Zinc, plans to build the 500MW solar project next to the Richmond Valley BESS, one of two eight-hour battery energy storage projects selected for development in the recent NSW tender.

## How do I charge my arkpak battery?

Solar panels convert the sun's free energy into DC electricity, which in turn charges your battery via a solar charge controller. Set up your solar panel in the sun (ideally at a 30 degree angle) and connect it to your ArkPak, via the external terminals, making sure you go through a solar charge controller to protect your battery from overcharging.

## Could a 500MW solar farm be the world's largest battery?

Sophie has been writing about clean energy for more than a decade. With plans locked in for a battery that could be the largest of its kind in the world, Ark Energy is seeking approval for a 500MW solar farm to go with it.

Ark-Solaris is your one-stop-shop to plan and supply your Solar Power Energy project. Our customers benefit from our solid distribution network, well-founded technical background as well as distinctive service consciousness.
