Does Arkansas offer solar rebates or tax credits?

Arkansas offers a few solar panel incentives in the form of financing programs. Based on our research, Arkansas does not have solar rebates or state tax credits. Here is an overview of the available solar energy programs in the state of Arkansas:

What is the solar investment tax credit (ITC) in Arkansas?

The solar Investment Tax Credit (ITC) is one of the most beneficial solar incentives in Arkansas, as in almost every other state. While not a refund or direct time-of-purchase rebate, the federal tax credit allows homeowners to deduct 30% of their total solar panel system cost from their income tax burden.

What are state-level solar rebate programs in Arkansas?

State-level rebate programs in Arkansas provide cash incentives to homeowners and businesses who install solar panels. These programs aim to reduce the upfront costs of solar system installation. By offering financial assistance, the rebates make solar more affordable and accessible to residents and businesses in Arkansas.

Is it worth going solar in Arkansas?

Arkansas' sunny climate and low solar panel pricing can make it worth going solar in the state. Homeowners can also save on their solar power system by claiming the federal solar tax credit, worth 30% of total project costs.

How much do solar panels cost in Arkansas?

The average cost of solar panels in Arkansas is \$2.67 per watt or \$16,020, which the ITC brings down to \$11,214. To apply for the tax credit, you must complete and attach IRS Form 5695 to your federal tax return (Form 1040 or Form 1040NR).
