

Does Austin Energy have a solar standard offer?

With extensive rooftop space, abundant sunshine and an innovative electric utility, Austin Energy has a unique opportunity to add megawatts of rooftop solar power to the grid. The Solar Standard Offer program allows commercial property owners to either host solar panels on their rooftops or lease their roof space to third-party solar developers.

Where does Austin Energy buy power?

Austin Energy purchases power from generators across the state, including multiple wind and solar farms, a nuclear power plant, gas powered energy, coal and more. Source: Austin Energy (KXAN Infographic/David Barer)

How much does Austin Energy pay for solar panels?

Austin Energy will compensate System Owners based on the energy their solar panels generate. Rates are set at \$0.1124 per kWh for systems under 1 MW and \$0.0841 per kWh for larger systems and reflect the cost-savings benefits for the utility by contracting with local solar providers.

Does Austin Energy Invest in renewables?

Solar and wind combined, harnessed from 17 locations, account for 49% of the power the utility purchases. Natural gas and nuclear account for 38%, according to Austin Energy. Austin Energy's investment in renewables reflects - rather than diverges from - Texas' energy market.

Does Texas need wind & solar?

Asked if wind and solar are needed to keep Texas' grid stable, Korgel replied: "Absolutely." Austin Energy, one of the country's largest publicly owned electric utilities, said renewable energy is "essential" despite the oncoming national headwind.
