

Where is Tesla Energy Plan available in Australia?

Effective from August 8, 2024 for Ausgrid Distribution Network. 4 The Tesla Energy Plan is available in South Australia, Victoria, New South Wales, South East Queensland (Energex Network) and the Australian Capital Territory. Tesla Energy Plan is delivered in partnership with licenced energy retailer Energy Locals Pty Ltd, ABN 23606408879.

Will South Australia's largest virtual power plant help reduce energy bills?

More than 3000 social housing tenants in South Australia will soon join in Australia's largest virtual power plant (VPP), helping to deliver lower energy bills and a more resilient electricity grid. Tesla, with support from the Government of South Australia, is developing a network of Housing SA homes fitted with solar and Tesla Powerwall.

Does Australia have too much solar power?

Representative image. In Australia's sun-drenched landscapes, a renewable energy revolution is unfolding. Once criticized for its slow adoption of solar power despite abundant sunshine, Australia is now at the forefront of tackling one of the most unexpected challenges in the green energy transition: too much solar power.

How will Tesla manage solar and battery systems?

These solar and battery systems will be centrally managed and controlled by Tesla as part of their VPP. A VPP is a network of distributed energy resources. This includes homes with solar and battery systems - all working together as a single power plant.

Will Tesla install solar & Powerwall Systems on Housing SA homes?

Tesla, with support from the Government of South Australia, is developing a network of Housing SA homes fitted with solar and Tesla Powerwall. Phase 3A of the SA VPP will see Tesla install 3000 solar PV and Powerwall systems on Housing SA properties across the state.
