

Availability of electric car charging stations in usa east coast

How many EV charging stations are there in the United States?

As of September 2023, there are over 59,000 public and private EV charging stations with over 157,000 individual ports in the United States. Each and every year the numbers continue to rise as car manufacturers, government agencies, and charging networks increase development of new stations.

Where are EV charging stations located?

As seen in the map above, most electric vehicle charging stations in the U.S. are located on the west and east coasts of the nation, while the Midwest strip is fairly barren aside from the state of Colorado. California has the highest number of EV charging stations at 15,182, making up an impressive 29% of all charging stations in America.

Which state has the most EV charging stations?

California has the highest number of EV charging stations at 15,182, making up an impressive 29% of all charging stations in America. In fact, the Golden State has nearly double the chargers of the following three states, New York (3,085), Florida (2,858), and Texas (2,419) combined.

Which state offers free EV charging?

On the other hand, Massachusetts is the stingiest state of the top 10, with only 6% of charging stations (150 total) in the state offering free charging for electric vehicle drivers. While free EV chargers are great, having access to fast chargers can matter just as much, depending on how much you value your time.

How many EV charging stations does GM energy have?

Per a joint release from GM Energy, Pilot, and EVgo this morning, it has successfully expanded its EV charging network to over 130 Pilot and Flying J stations across the US in over 25 states, particularly along popular transit corridors and major interstate routes.

Why are EV charging stations important?

As the electric vehicle market continues to expand, having enough EV charging stations is essential to enable longer driving ranges and lower wait times at chargers.
