

What are solar rebates & incentives?

Rebates and incentives are a crucial way to encourage broader adoption of solar energy and full home electrification across the country. These incentives will typically come from your utility, state government, or the federal government in the form of tax credits, property tax abatements, one-time rebates, or performance-based rebates.

Where can I get a solar energy rebate?

Utility rebates are offered by electric utility companies to encourage homeowners to install solar panels or other solar energy technologies on their properties. Homeowners can receive these rebates directly from their utility provider.

Are there programs to make solar more affordable?

There are programs designed to make solar energy more affordable for homeowners. Many cities, states, utility companies and community organizations offer additional incentives and rebates to encourage renewable energy adoption. This guide will cover which programs are available, how to apply, and how to maximize your solar power investment.

What incentives are available for solar energy installation?

Homeowners can combine tax breaks with cash-back rebates offered by governments, manufacturers, and installers to lower the cost of purchasing and installing a new solar system. Additionally, there are performance-based incentives, where money is paid in exchange for solar energy production.

Does your state have a solar incentive?

Nearly all states have some form of solar incentive -- such as rebates, property tax exemptions, or grants. State programs are subject to frequent change, so it's best to consult a reputable installer or your state's energy department or public utility commission (PUC) to ensure you're not missing out.

How much is a solar tax credit?

Right now, the best incentive for going solar is the 30% federal solar tax credit, which equals 30% of installation costs and reduces what you owe in federal income taxes by thousands of dollars. The average solar installation costs around \$20,000, meaning you'll receive a tax credit of \$6,000. How do I claim the solar tax credit?
