

Aztec wind and solar power refinance mortgage with solar

How do I finance a solar system?

Find the home you want, then add a system. Under FHA's Solar and Wind Technologies option, you can finance a system costing up to 20% of the property's value. You would pay just 3.5% down on the entire loan. Here's an example: The home and the solar panels would be covered with one mortgage loan.

Should I get an FHA or a leased solar system?

Compare multiple solar quotes from vetted local installers. An FHA loan is a favorite among first-time buyers because it lets them put just 3.5% down and is lenient on credit scores and income levels. But another benefit is that you can wrap the cost of an owned (not leased) solar panel system into your mortgage for whatever home you choose.

How do I get a solar loan if I'm a first-time buyer?

Certain mortgage programs let you do just that. Compare multiple solar quotes from vetted local installers. An FHA loan is a favorite among first-time buyers because it lets them put just 3.5% down and is lenient on credit scores and income levels.

How do I qualify for an energy-efficient home loan?

To see if you qualify, get a pre-approval from an FHA lender specializing in energy-efficient loan options, then start shopping for homes in your price range. Like FHA, Fannie Mae allows you to finance energy-efficient improvements at the time of home purchase.
