

How does Baby-G Tough Solar work?

The BABY-G Tough Solar technology works by utilising small solar panels on the watch face to convert light into energy, which is then stored in a rechargeable battery, powering your watch for several months on a single charge, even if it's not exposed to light for a period of time. Extend the good times with extended battery life.

What are the features of the Baby-G msg-s200?

As a Baby-G model the MSG-S200 features full shock resistance like a G-Shock. Other features include Tough Solar power, 100-meter water resistance, NeoBrite luminous hands, world time, 1/100 second stopwatch (total 59'59.99"), countdown timer (total 60 minutes), daily alarm, battery level indicator, and Super Illuminator LED light.

Is the Casio G-MS a Baby-G Watch?

It is not a typical Baby-G watch and does not have Baby-G branding on the front of the watch (just G-MS and Casio logos). It is aimed at the modern and active woman with its more refined exterior style and a smaller form factor with a 38.4 mm width and a relatively slim 12.3 mm thickness.

What is Casio Tough Solar System?

The CASIO Tough Solar System is so advanced that even the weakest light sources are sufficient to operate the watches. The solar cells are so small and inconspicuous that they can be integrated easily into every watch face design. CASIO's solar field can also be manufactured in any color and design.

What is a Baby-G G-MS msg-s500?

The Baby-G G-MS MSG-S500 series is a February 2020 release for Japan and Asia. This solar-powered watch for women has a traditional style that includes a full analog display with three hands, a screw lock crown, and a date display for the day of the month.

How much does the MSGS600-2A G-Shock cost?

The MSGS600-2A G-Shock has a list price of \$170. Update: G-Shock U.S. is releasing the MSGS600-2A, with a silver stainless steel case and blue markers and band.
