

What is a backup solar generator?

Backup solar generators provide backup power for when an electrical grid fails, providing an efficient alternative for installing a complete system. Backup solar generators provide enough power to turn on appliances such as refrigerators, washing machines, televisions, and more in the event of a blackout.

How to set up solar panels for battery power backup? [East West Garage youtube.com](#) Should you use a solar generator for home backup?

The biggest downside of using a solar generator for home backup is that you are limited in storage capacity. Unlike a wired solar system, you cannot create a large battery bank that stores enough power to last days. Most solar generators have smaller lithium batteries that are good for a few hours to a couple of days.

What is the best solar generator for home backup?

If you're looking for the best solar generator for home backup in the event of a power outage, the EcoFlow Delta Pro stands apart from the pack, thanks to an unrivaled power and output capacity. The Delta Pro alone packs a 3,600Wh wallop, and you can expand that to 25,000Wh by chaining it to extra EcoFlow batteries and generators.
