

What is EVE Energy?

EVE Energy specializes in advanced lithium battery technologies, with a strong emphasis on safety, efficiency, and sustainability. One of its core offerings is Lithium Iron Phosphate (LFP) batteries, widely used in energy storage systems due to their reliability and long cycle life.

What makes Eve Energy batteries unique?

EVE Energy's batteries feature innovative cooling solutions, including composite superconducting phase change technology, ensuring consistent performance and safety. With a focus on both current needs and future advancements, EVE Energy is working on solid-state battery technology, aiming for breakthroughs by 2026 and 2028.

What is EVE Energy's LFP battery technology?

The company has developed high-capacity LFP cells, such as the "Mr. Big" series, which surpasses industry standards with capacities exceeding 600Ah. In addition to LFP, EVE Energy is exploring sodium-ion battery technology as a cost-effective alternative to lithium-ion batteries.

What is EVE Energy & Mr Big?

On December 10th, Eve Energy's 60GWh Super Energy Storage Plant Phase I & Mr. Big has been put into production. This factory is the largest single energy storage factory in the industry while Mr. Big is the first mass-produced 600Ah+ large battery cell.

How does Eve Energy support the mass production of Mr Big's battery cells?

To support the mass production of Mr. Big's large battery cells, EVE Energy is committed to building a world-class super energy storage plant. It has established a virtual factory leveraging digital twin technology, creating a super intelligent factory that integrates automation, digitization, and low-carbon processes.

Who makes EV batteries?

EVE Energy Co., Ltd., founded in 2001 in Huizhou, China, is a leading lithium-ion battery manufacturer. Specializing in batteries for electric vehicles, energy storage, and consumer electronics, it partners with brands like BMW and Tesla.
