

What is a pylontech lithium battery?

Pylontech's lithium batteries were some of the first modular batteries to be offered in the ESS market in an enclosure holding both the lithium cells and battery management/control system in a simple rack-mounted unit.

What is pylontech battery management system (BMS)?

Pylontech's batteries come with an advanced in-built battery management system (BMS). This intelligent system that monitors critical parameters like voltage, current, and temperature, ensures optimal performance, performs battery balancing and protects the batteries.

How many modules can a pylontech lithium iron phosphate battery connect?

This Pylontech Lithium Iron Phosphate battery can be connected up to 16 modules per system in configuration of UP TO 1S16P, 2S8P or 4S4P. *See Product User Manual or Datasheet for more information

Who makes pylontech batteries?

The makers of Pylontech batteries, Pylontech Technologies Limited is a Chinese company that was founded in 2009 as a dedicated energy systems provider. With over 4.5 GWh of batteries installed since, Pylontech is a world leader in the production of both low and high voltage lithium iron phosphate batteries.

How long do pylontech batteries last?

Pylontech's batteries have cycle life that exceeds 6000 cycles, corresponding to about 11 years of work, with 80% capacity expected to be retained at the end of its lifespan. Pylontech's batteries come with an advanced in-built battery management system (BMS).

Are pylontech batteries vertically integrated?

Pylontech branded batteries are vertically-integrated meaning that the company is in charge of all stages, from design to construction, down to the smallest detail and does not outsource any of the process. Pylontech's LFP batteries are made with lithium iron phosphate (LiFePO₄ or LFP) battery cells.
