

Can pylontech batteries be read independently?

Since the newer ICC software (2.4.3 and 2.4.4) has been used, each Pylontech battery values could be read independently. I have noticed the last 2 days (using the batteries every night) that batteries number 1, 2 and 3 discharge almost at the same rate, but that battery number 4 is discharged at least 20% more than the other 3.

What is a pylontech battery control project?

This project allows you to control and monitor Pylontech US2000B, US2000C and US3000C batteries via console port over WiFi. It's a great starting point to integrate battery with your home automation. I ACCEPT NO RESPONSIBILITY FOR ANY DAMAGE CAUSED, PROCEED AT YOUR OWN RISK Low cost (around 20\$ in total).

Can Pylontech batteries support multiple modules?

The Pylontech batteries come with a Battery Management System (BMS) that can support multiple battery modules connected in parallel. This interfaces with the Victron GX device. Note that some Pylontech products may not be compatible with Victron, such as the UP2500N A 01V00101, which does not have a CANBUS port and is not supported.

How to check pylontech battery voltage?

To check the voltage of a Pylontech battery, look for the Max Charge Voltage parameter in the GX device: Device List -> Pylontech battery -> Parameters menu. This voltage parameter is sent by the Pylontech system via the CAN-bus cable, along with other parameters.

Are pylontech batteries suitable for commercial applications?

PylonTech Batteries in Cape Town are now also available in high voltage modules for commercial applications. They are an ideal solution for residential storage applications, with standard 48V/50AH specification, up to 90% usable capacity, and a 6,000 cycle-life warranty.

Are pylontec batteries any good?

Very simple and straight forward, you can not fault Pylontec batteries, they have a well documented track record. If I were to do the installation all over again, I will still buy Pylontec I would say that is an overwhelming "Yes" to purchase Pylontech.

Does anyone know why I would get an exception information on batteryview : accuracy string cannot be parsed to double. I've made up the cable. I start the scan and then get the information exception. I am just trying to ...
