

Do solar companies in Hawaii provide solar panels?

Most solar companies in Hawaii offer solar panels. However, some companies only provide access to PV panels. It's recommended to look for a company with at least five years of experience or more.

Are solar batteries a good option for Hawaii residents?

Solar batteries can be a good option for Hawaii residents. They can help keep costs down by allowing residents to take advantage of the battery cashback program. Additionally, batteries offer an alternative to net metering.

What is the cost of solar in Hawaii?

Although the average cost per watt for solar panels in Hawaii is \$3.39, which is close to the U.S. average of \$3.33, the typical system size a homeowner needs is just 5.5 kilowatts (kW). This means the cost for a typical solar system in Hawaii is approximately \$18,965 ( $\$3.39/\text{watt} \times 5.5 \text{ kW}$ ).

Are solar companies going out of business in Hawaii?

Unfortunately, more and more solar companies in Hawaii are going out of business due to increased demand. Younger companies may be more likely to go out of business, which could void your warranties.

Is Hawaii a good place to go solar?

Hawaii is an excellent place to install solar panels. It is one of the most lucrative places in the country due to its high energy prices and below-average solar panel system size requirements. On average, systems pay for themselves in just five years and save an average of \$76,847 after the breakeven point.

Do Hawaii residents pay more for energy?

Hawaii residents pay the highest energy bills in the country, with a cost per kilowatt-hour (kWh) of over 40 cents. Their energy bills are higher than in any other state. 7 Panels with a high efficiency rating help offset these utility bills, maximizing savings over time and contributing to a quicker system payback.
