

Does BC Hydro offer a solar rebate?

Up to \$600 to offset this cost. There is a rebate from BC Hydro that provides up to \$5,000 for solar and another \$5,000 for batteries. These rebates are available for any system installed after June 27th, 2024. When you accept the rebate you agree to a new rate class schedule from BC Hydro that might pay you less for any net power exported.

What rebates are available for solar panels in BC?

These rebate programs vary depending on the type and size of the solar system installed. For instance, homeowners can receive up to \$1,200 for installing a solar PV system of up to 10 kW capacity. Net metering is another incentive program available for homeowners in BC who install solar panels.

Does Canada offer a solar energy grant?

The federal government of Canada also offers BC solar energy grants for businesses that invest in renewable energy, including solar. These grants can cover up to 25% of the total project costs, up to a maximum of \$250,000.

What incentives are available for solar panels in BC?

Net metering is another incentive program available for homeowners in BC who install solar panels. Under this program, excess energy generated by the solar panel generates power that can be fed back to the BC Hydro grid. In addition, homeowners can receive credits for the extra energy they generate. This they can use to offset their energy bills.

What is the new home energy rebate in BC?

A: The new federal grant for solar energy in BC is the Canada Greener Homes Grant. It provides up to \$5,000 for homeowners to make energy-efficient home upgrades, including solar PV systems. This grant is part of the federal government's plan to reduce greenhouse gas emissions and promote clean energy.
