

Why should you get a solar power bank?

Having a solar power bank means being able to charge all your electronics anywhere, any time. Say good-bye to dead mobile phones during travel or extended periods away from an outlet. No more dying tablets, phones, or other small devices. Sunlight is all you need to charge your gear on the go. Talk about peace of mind!

What are solar powered power banks?

Solar powered power banks are detachable batteries fitted with solar panels. They are used to store extra energy for electronic devices and can be recharged using sunlight. They do not need to connect to an outlet for recharging. However, they can be plugged into an electrical receptacle to double up the electricity used.

What can you charge with a solar power bank?

Having a solar power bank means being able to charge all your electronics anywhere, any time. Say good-bye to dead mobile phones during travel or extended periods away from an outlet. No more dying tablets, phones, or other small devices.

Which solar power bank is the best?

The Solgaard Solarbank is our top pick due to its high value. It's light, durable, charges quickly, and stores up to 5 full phone charges. However, if you need a larger battery capacity, consider other options as well.

What makes solar power banks appealing?

Solar power banks are appealing because they offer the best of both worlds, and at such a low cost. Power stations and solar panels are rapidly taking over the energy landscape, from electric cars to energy-independent, single-family homes.

Do solar power banks need to be charged first?

Solar power banks can be charged before using solar energy using a normal electric outlet. When using solar power banks to charge a device, connect it with a USB or wireless connection.
