

What is the world's largest rooftop solar power plant?

Credit: Gurpreet Singh/Hindustan Times /Getty Images The north Indian state of Punjab has inaugurated what it claims is the world's largest rooftop solar power plant. Spread over eight rooftops across 82 acres, it can produce up to 11.5 MW of electricity.

Will Punjab's Solar power plant be a role model for other states?

The Punjab government says that the project will generate enough electricity to power 8,000 homes and hopes that it will be a role model for other states to replicate similar rooftop solar plants. An Indian security personnel poses for media as he walks over rooftops covered in solar panels at the Solar Photovoltaic Power Plant on May 17, 2016.

Will RSSB-EES install a solar power plant on idle rooftop space?

In line with their vision and the Punjab government's grid connected rooftop solar policy in place, RSSB-EES decided upon installation of a solar power plant on idle rooftop space, available over the Satsang sheds.

Who is Tata Power Solar?

Tata Power Solar took up the engineering, procurement and construction of a 16 MW solar rooftop project for R.S.S.B. Educational & Environmental Society (RSSB-EES).

How a grid connected Solar System Works in Punjab?

The grid connected system, equipped with net metering can feed surplus electricity to the grid under the Punjab government's grid connected rooftop solar projects scheme. Tata Power Solar has used proven technology and best-in-class equipment to ensure long quality life of the solar power plant.

Why should you choose Tata Power Solar?

Tata Power Solar has used proven technology and best-in-class equipment to ensure long quality life of the solar power plant. The solar modules come with a 25 years' warranty and reliability of India's largest solar player, backed by Tata Group.

Tata Power Solar has successfully commissioned a 12 MW solar rooftop project for R.S.S.B. Educational & Environmental Society (RSSB-EES). The plant will produce more than 150 lakh ...
