

What are the benefits of community solar?

No rooftop panels. Free to join. Community solar has huge benefits for consumers, cities and towns, and for combatting climate change. This clean energy solution is available to anyone, costs nothing up front, and lowers your utility bills. It also supports local economies, promotes energy independence, and strengthens the power grid.

Why should I participate in a community solar project?

By participating in a community solar project, you can enjoy financial benefits such as energy cost savings, reduced electricity bills, and potential incentives or credits for the solar energy you receive. If you move within the same utility service area, you can usually transfer your subscription to your new address.

Can Community Solar Save you Money?

Check out Perch Energy and get started saving money--and saving the planet--with community solar! Easy savings. No rooftop panels. Free to join. Community solar has huge benefits for consumers, cities and towns, and for combatting climate change. This clean energy solution is available to anyone, costs nothing up front, and lowers your utility bills.

Who can benefit from solar energy?

Access to Solar Energy: Participants who are unable to install solar panels on their own properties, such as renters or those with shaded rooftops, can still benefit from clean solar energy.

What is a community solar project?

Community solar projects have gained significant attention in recent years as a viable solution to promote renewable energy and provide access to clean power for communities. These projects allow multiple participants to benefit from a shared solar energy system, even if they cannot install solar panels on their own properties.

Are community solar programs right for You?

If you aren't able to install rooftop solar installations on your own home--due to the upfront cost, roof constraints, or you're a renter--community solar programs offer a way to participate in the renewable energy revolution and save money. That's because there are no rooftop panels involved on your home at all!
