

# Best battery and solar powered generator for power outages

Are solar generators a good choice?

Solar generators offer a green solution that can be just as effective as gas and propane generators. Whether you are looking for a viable "off the grid" living option or want a backup power supply in case of total power loss, solar generators are a good option.

What can a home solar backup generator power?

A home solar backup generator can power your refrigerator, computer and electronics, and a handful of lights and other appliances. However, they are not yet able to match the full-home power supply of larger backup generators powered by natural gas and propane.

Can a solar powered generator protect your home?

The best protection used to be a gas backup generator, but our experts now recommend considering a solar powered generator for your home.

What can a solar powered generator charge?

Solar-powered generators can charge a variety of devices, including power tools, laptops, and personal devices like Bluetooth headphones and speakers. With a higher power capacity, they can even power household appliances during power outages.

Can a solar generator recharge a power station?

The benefit of a solar generator is that you can use the power of the sun to recharge your power station--depending on your home setup, you may even be able to recharge your power station at the same time that you are using the unit to power an appliance or two. Should I buy a solar generator?

If the primary cause of power outages where you live are wildfires or hurricanes, or other summer events, I would recommend looking at solar generators. If the primary cause of power outages where you live are winter storms, then you will likely be better off with a larger power station. Read Next: [What Can a Solar Generator Power](#)
