

Which solar-powered keyboard is best for iPad Air?

For iPad Air, GCell Solaris an excellent choice. This Bluetooth-friendly keyboard is solar-powered, compact, lightweight, and comfortable to type on.

What is a solar rechargeable keyboard?

A solar rechargeable keyboard is a type of keyboard that uses integrated solar panels to charge from any bright light source, such as sunlight or indoor light. This eliminates the need to worry about low batteries or tangled wires. An example is the Xcellon Wireless keyboard, which is easy to install with its Plug-and-Play functionality.

Does the Logitech wireless solar keyboard K750 have a battery?

Would you like to tell us about a lower price? Battery hassles are a thing of the past with the solar-powered Logitech Wireless Solar Keyboard K750. It charges itself whenever there's light, so you can say good-bye to batteries, power bricks and charging cables.

Are solar-powered keyboards a viable alternative to battery-powered PC accessories?

Using advanced photovoltaic technology and fast-charging supercapacitors, the keyboard actually harnesses ambient light to store energy, eliminating the need for disposable batteries. We've seen plenty of solar-powered devices over the years, but only recently have we seen viable alternatives to battery-powered PC accessories.

How long does a solar keyboard battery last?

One of the first things to notice is a row of solar panels on the top, which trickle charge the keyboard. The keyboard uses 65uA in idle and 30uA when in a deep sleep. With the solar panels providing anywhere between 600-1200uAh a day, the battery should last a year and a half under even harsh conditions.

How much does the GCell Solar keyboard weigh?

The GCell Solar keyboard is compact and lightweight, weighing only 1.08 pounds. Bluetooth-friendly keyboards like GCell Solar are an awesome match for iPad Air. Solar powered, charge anywhere as long as there's light, sun or otherwise. Comfortable typing - the keys are placed at least 2mm from each other.
