

How do I install a home solar power system?

Before starting the installation process for a home solar power system, it's important to grasp the elements involved such as the panels themselves the inverters, mounting systems and optionally adding battery storage. These components are essential in transforming sunlight into electricity that can be used effectively.

How do I choose a solar panel?

When selecting a solar panel, consider your available space, the surface you'll be mounting it on, and whether you want a portable or permanent installation. Then move on to determining how many panels and what rated power and efficiency they need to meet your electricity consumption needs.

How do I choose a solar system?

Consider your space, budget, and energy needs to choose the best type for you. Beyond panels, every solar system relies on several key components. An inverter converts the energy your panels produce into usable electricity for your home. For hybrid or off-grid systems, batteries store energy for use when the sun isn't shining.

Should you DIY a solar panel system?

Setting up a solar panel system can be one of the most exciting home projects you'll ever take on, whether you're ready to tackle it yourself or prefer to bring in the pros. DIY offers that hands-on satisfaction--the thrill of piecing together your own energy source, step-by-step, right on your roof.

How do I set up a basic solar system?

The three main components in the solar panel setup are the solar panel, the charge controller, and the battery. To set up a basic solar system, first understand how these components connect together. The basic wiring setup is shown below.

How do I choose a solar panel mounting system?

Your selection of the system will be determined by your requirements and the configuration of your solar panel setup. The mounting system is responsible for attaching the panels to either your roof or the ground setup you have in place at your property location. There are choices for mounting setups like roof mounts or ground mounts in the market.
