

What is the best smart thermostat?

Now that's smart! The Nest Learning Thermostat is also known for being the most stylish smart thermostat. With seven different colors to choose from and a stainless steel rim, there is bound to be a Nest that fits your home's look. It also has a simplistic display, making it more aesthetically pleasing than some other brands.

Which smart thermostat saves the most electricity?

One of the easiest ways to cut down these expenses and save money is by installing a smart thermostat. Two of the most popular smart thermostat brands, ecobee and Nest, are able to help you reduce your electricity bills. But which of these smart thermostats is the smartest?

What is a smart thermostat?

Smart thermostats are the newest way to control your home's climate. Just like a traditional thermostat, smart thermostats will connect to your heating and cooling system so you can adjust the temperature.

Should you buy a smart thermostat?

You can program smart thermostats according to your schedule to get your home to the perfect temperature, all while saving money on your electricity bills. Before you purchase a smart thermostat, you need to make sure that it is compatible with your HVAC system, your home's wiring, and your smart home setup (if you have one).

Does Home Depot have a smart thermostat?

Home Depot does offer a smart thermostat, the Commercial Electric Smart Thermostat. It's a residential thermostat built to operate with their Hubspace smart home platform, and it's compatible with Alexa and Google Home.

Do smart thermostats work with smart home security systems?

Some smart thermostats are able to pair with your smart home security system. Both Nest and ecobee thermostats include motion sensors that can be integrated with smart security cameras and alarms to increase your home's security.
