

What is a BigBlue solar panel Charger?

BigBlue 25W Solar Panel Charger and 30... **VERSATILE SOLAR CHARGER:** Fast-charging USB-A and PD 24W USB-C ports can quickly charge your Android and Apple cellphones, tablets, flashlights, power banks, etc. DC output (17.4V/1.73A Max) is compatible with small power stations.

Why should you choose a BigBlue 28W solar panel?

The special PET polymer surface on this solar panel makes it more durable and resistant to scratches than other panels on the market. This means that you can take it with you on all your outdoor adventures without worrying about damaging it. Our BigBlue 28W SunPower Solar Panel is one of the easiest solar panel chargers to use on the market.

How many volts can a BigBlue solar power 28 charge?

Each maximum output is 5V/2.4A and the total maximum current is at 5V/4.8A. BigBlue SolarPower 28 (with no ammeter) solar charger allows you to harness the sun's energy to charge multiple devices at once. Embedded smart charge technology discerns your device's requirements and delivers the perfect charging speed.

Can BigBlue 36W solar charger be used outdoors?

The BigBlue 36W solar charger is suitable for use outdoors, such as during a trek, hiking, or camping. It can handle exposure to damp conditions like morning dew or light rainfall. Note: The solar panels charger cannot store electricity; you need to connect your device directly to the solar panels in outdoor sunlight.

How does the BigBlue 28W solar panel Charger work?

The BigBlue 28W solar panel charger can measure the current value in real-time, making it more convenient for you to use. It also has sunlight intensity and the used cable. If your device has a limited input current of 1A (such as the iPhone), the amount of ammeter will show between 0.8A and 1A in theory.

How many USB ports does a BigBlue solar power 28 have?

Equipped with three upgraded USB (Type A) ports. Each maximum output is 5V/2.4A and the total maximum current is at 5V/4.8A. BigBlue SolarPower 28 (with no ammeter) solar charger allows you to harness the sun's energy to charge multiple devices at once.
