What's in a bluetti ac70?

Let's take a look at what Bluetti has packed into the AC70. Input from a 100-watt solar panel and simultaneous DC and AC output. SOLAR: I have a 100W solar panel permanently set up on my south-facing patio at the studio. I use it to keep all my power stations topped off. Most of my small appliances at work run off the solar-fueled power stations.

How much power does a bluetti ac70 use?

The LCD readout soared to over 1,000 watts, but that wasn't a problem for the AC70 because of Power Lifting, which allows the Bluetti to handle high-power resistive loads up to 2,000 watts. (If it's disabled, you can turn it on in the Setting Mode by pressing and holding the AC power button.)

How long does it take to charge a bluetti ac70?

But the option to charge via solar or your car's 12V output is nice. Speaking of, 12V car charging takes a long time - around 8-9 hours. I ran the BLUETTI AC70 through a series of tests using a few household appliances that I tend to use on a regular basis.
