

Can businesses in Newcastle use solar panels?

Yes, business owners in Newcastle and nearby New South Wales cities can use solar panels to save on power costs. We install small to large-scale solar PV systems for commercial use in Newcastle.

Do you need a solar battery in Newcastle, NSW?

When you call Newcastle Solar Power for solar installations, our team would usually recommend options for batteries in Newcastle, NSW. A solar battery allows you to store excess energy absorbed by your solar panels so that you can use it after sunset, on cloudy days, and even during power outages.

What services does Newcastle Solar Power offer?

Newcastle Solar Power offers various services, including roof-mounted solar systems for residential installations. These are the most popular type of residential solar installations today, according to Solar Panels Canberra.

Which solar panels are available in Newcastle?

In Newcastle, our team offers the following solar panel technologies: Poly panels: These are the cheaper option, but they have lower performance and power. Mono Perc panels: These are the most popular option and offer great performance for local Newcastle conditions. Bi-facial solar panels: These are the most expensive option, but they have the highest performance and are rare in Australia.

How much energy does a solar panel produce in Newcastle?

On average, solar panels in Newcastle, New South Wales, produce around 3.9kWh of energy for every kW of solar installed. Therefore, a 6.6kW solar panel will produce approximately 26kWh of energy per day.

How much does a solar installation cost in Newcastle?

If you have a quote for a solar installation in Newcastle, visit our solar forum and you can have your quote reviewed by our team and community. Examples of some pricing that we have seen for quotes in STC zone 3 areas: Panels: 4.95 kW, 18 x 275W ZN Shine | Inverter: SolaX 5kW | Price: AUD\$6550 gross (\$1.3 per W - based on inverter output).
