Its AC200P model is one of the most popular portable power stations with solar power out there. With a 2,000W power output (4,800W peak), it can run almost any electronic device, be it your smartphone or a large appliance like a dishwasher.

What are solarplay portable power stations?

SolarPlay portable power stations are high-performance products, developed by our dedicated production plant and scientific researchers. SolarPlay has reliable products for outdoor adventures and backup power.

What size is a solar power station?

A: The DC input size of the power station is 5.5mm x 2.1mm. Any solar panel connected to a DC input will work. In addition, it has built-in foldable solar panels and 10 different adapter sizes to choose from. Q3: Is it a Lifepo4 or a lithium-ion battery? A: Yes, ours are Lifepo4 batteries that are designed for up to 10 years of daily use.

What kind of battery does a solar power station use?

It uses a LiFePO4 battery that can last for more than 2,000 charging cycles and has built-in BMS protection. You can use this portable power station with solar power to charge all your electronic devices, ranging from smartphones to AirPods. It can run any device that has a power input less than 300W.

What is a portable power station?

Power stations, or should I say, portable power stations are battery-powered inverter generators that convert DC to AC current. It provides power to multiple devices through various ports and outlets. In fact, you can run your refrigerator and charge your smartphone, both at the same time using the power station.
