

What is BYD Super E-platform?

The newly launched Super e-Platform is the world's first mass-produced 'full-domain 1000V high-voltage architecture' for passenger vehicle. It brings the battery, motor, power supply, air conditioning, and other components up to 1000V. BYD has also officially launched the 'Flash Charging Battery'.

How many watts can a BYD battery charge?

The charging current reaches 1000A, and the charging rate achieves 10C, both of which are world records. With the support of ultra-high voltage (1000V) and ultra-high current (1000A), BYD 'Flash Charging Battery' can achieve the world's largest mass-produced charging power of 1 megawatt (1000kW).

What is BYD's 30,000 RPM motor?

At this launch event, BYD also unveiled the world's first mass-produced 30,000 RPM motor. Luo Hongbin, BYD's Senior Vice President, stated at the event: 'The 30,000 RPM motor not only significantly boosts the vehicle's speed but also greatly reduces the motor's weight and size, enhancing power density.'

Does BYD have a flash charging battery?

BYD has also officially launched the 'Flash Charging Battery'. From the positive to the negative electrode, it has built ultra-fast ion channels, reducing the battery's internal resistance by 50%. The charging current reaches 1000A, and the charging rate achieves 10C, both of which are world records.

When will BYD's Super E-platform launch in China?

As the first models to feature BYD's Super e-Platform, the Han L and Tang L have officially started pre-sales in China, and are set to launch in April. BYD's Super e-Platform, the world's most powerful professional pure electric platform, will redefine electric mobility, and lead the development trend of pure electric technology worldwide.

How does BYD's 'dual-gun charging' technology work?

Additionally, BYD's unique 'dual-gun charging' technology can instantly transform existing supercharging piles into flash charging ones and fast charging piles into supercharging ones. Our world-first 'intelligent voltage boost' charging technology is fully compatible with public fast charging piles, ensuring users can charge at any station.
