

What is CALB?

CALB is an ISO9001 certified manufacturer of lithium-ion cells and energy storage systems. They aim to provide the best battery solutions available today and in the future to promote a low carbon economy and sustainable development globally.

What is CALB's business?

CALB Group Co. Ltd. specializes in R&D, production, sales, and market application development of lithium batteries and related products. This includes battery materials, BMS, energy storage batteries, EV batteries, and ESS products. Founded in 2007, CALB is headquartered in Changzhou, China.

Who is CALB group?

CALB Group Co., Ltd., a new energy technology company, engages in the research and development, design, production, and sale of electric vehicle (EV) batteries and energy storage system (ESS) products in Mainland China, Europe, Asia, the United States, and internationally.

How much does a CALB battery cost?

When you add in the Amazon fees, shipping, and tax... it's not much markup. Just a convenient way to get some genuine CALB batteries :) This 180 Ah battery should be selling for \$1.20 per Ah at the most that is with a .10 per Ah markup. Although these batteries are great (if this really is a China Aviation Lithium Battery) this is a complete ripoff.

What products does CALB Group specialize in?

CALB Group Co., Ltd. specializes in R&D, production, sales and market application development of lithium batteries and battery materials, BMS, energy storage batteries and related integrated products. The company also engages in the design, production and sales of EV batteries and ESS products.
