

What is a CALB battery?

The battery adopts the all-tab laminated battery technology, which CALB says features high volumetric energy density and fast charging performance. The commissioning of the CALB factory in Hefei is only the first phase of three.

What makes CALB a great battery company?

Renowned for innovations like U-structure and solid-state technologies, CALB serves global automotive and industrial clients through a strong focus on R&D and manufacturing excellence. CALB Group Co., Ltd., formerly China Aviation Lithium Battery, stands as one of China's principal manufacturers of lithium-ion batteries.

Where is CALB battery made?

Chinese battery manufacturer CALB (China Lithium Battery Technology) has started production at its new 50 GWh factory in Hefei and said it will increase capacity there to 150 GWh. CALB is also now listed on the Hong Kong stock exchange.

What is CALB doing in 2027?

A notable achievement was the development of an all-solid-state battery scheduled for pilot production in 2027. CALB also launched an innovative OS (One-Stop) lithium iron phosphate battery pack for BAIC's latest electric vehicles, demonstrating their technical capabilities in automotive applications.

What is CALB committed to?

CALB Group Co., Ltd. As a global leader in new energy technology, CALB is committed to being an energy value creator.

Is CALB a stock in Hong Kong?

CALB is also now listed on the Hong Kong stock exchange. The new factory was first announced in the plant in Hefei in September 2021 where NCM cells for the automotive industry are to be produced. The new battery type is code-named L221, and is a mid-nickel high-pressure NCM battery that targets long ranges for electric cars of over 600km.
