How does solar power work in a camper van? [Renogy Off Grid Solar panels review](#) [youtube.com](#) Which solar panel is best for a camper van?

The Merlin Trailblazer Series Flexible Solar Panel has been designed for camper vans, bus conversions, and RVs. There are tons of options to choose from, making this an ideal choice for van dwellers who want to spend extended time off-grid. Depending on the size of your rig, you'll have no problem finding a panel that'll fit.

How do solar panels work on a campervan?

Solar panels will produce electricity at a different voltage to the one your campervan utilises. Most UK campervans and motorhomes will operate using a 12 Volt power system with a 12V battery or batteries. Systems that run on 24 Volts are possible but normally only on larger vehicles such as large motorhomes, trucks and buses.
