

What is a mobile EV charging station?

A mobile EV charging station, sometimes referred to as a portable EV charging station, is an electric vehicle charger that you can quickly and easily move from location to location or vehicle to vehicle. It is different from a stationary EV charger as it can be moved and is solely designed for the mobile charging of electric vehicles.

How does mobile EV charging work?

Mobile EV charging brings the power to you through battery storage, wherever you may be. It provides efficient ways to charge up your vehicle's battery without requiring you to connect to a fixed charging station and wait around. No need to worry if you can rely on it - the passage addresses this concern later in the text.
