

How much does a home EV charging station cost?

A home EV charging station could cost as much as £1,600 for the charger and installation combined. The ongoing cost you then need to consider is the daily cost of charging the electric car, which is why it's important to make sure you're on an electricity deal that works for you, whether it's an EV-specific tariff or not.

How to find a charging station for an electric car? [How To Charge An Electric Car: EV Charging Explained - DrivingElectricityyoutube.com](#) How do home EV chargers work?

Home EV chargers can be divided two ways: By their charging speed and their connector types. Charging speed is split into Levels 1 and 2. Level 2 chargers are generally between six and 10 times faster than Level 1, but require 240-volt power rather than the more common 120-volt socket.

Where should a EV charging station be located?

Preferably, the charging station should be situated no more than 3m from the connection port of your EV. You can have the outlet close to the garage door or in an area where you prefer to charge your EV. This way will give you more flexibility as you can charge the car whether it's inside or outside of the garage.
