

What is a charging station?

A charging station, also known as a charge point or electric vehicle supply equipment (EVSE), is a power supply device that supplies electrical power for recharging plug-in electric vehicles.

Where can I find EV charging stations?

The west coast has a robust EV charging network with hundreds of DC fast chargers and thousands of Level 2 charging units. Electric vehicle drivers can charge their vehicles at shopping centers, fueling stations, and restaurants within a half mile of highway interchanges while grabbing a cup of coffee or shopping.

How much does a car charging station cost?

The cost for a single car charging station from a service provider ranges from \$1,200 to \$2,500. Many service providers offer stations with two charging cables, allowing two vehicles to be charged at the same time.

Where are public charging stations usually located?

Public charging stations are typically found street-side or at retail shopping centers, government facilities, and other parking areas. DC charging stations are commonly equipped with multiple connectors to charge various vehicles that use competing standards. Private charging stations are usually found at residences, workplaces, and hotels.

Who installs the charging station?

An electrician, typically recommended by your service provider, can complete the installation of the electric vehicle charging station. This process may involve electrical panel upgrades or installations, installing the charging station(s), and connecting the charging station(s) to the electrical panel(s). In some instances, your electric utility provider may need to get involved.

Where can you find private charging stations?

Private charging stations are usually found at residences, workplaces, and hotels. Public charging stations are typically found street-side or at retail shopping centers, government facilities, and other parking areas. Multiple standards have been established for charging technology to enable interoperability across vendors.
