

Car charging stations will change the complexion of Americas wilderness

Will America need more charging stations?

With municipal, state, and federal governments all pushing to increase the number of electric vehicles on the road and decrease carbon emissions, experts agree that America will need more charging stations-- a lot more.

Why are EV owners frustrated with a lack of charging locations?

BOSTON -- New data-driven research led by a Harvard Business School fellow reveals a significant obstacle to increasing electric vehicle (EV) sales and decreasing carbon emissions in the United States: owners' deep frustration with the state of charging infrastructure, including unreliability, erratic pricing, and lack of charging locations.

Are pole-mounted charging stations a cost-effective way to expand curbside charging?

Meanwhile, in Los Angeles, the city is adding hundreds of pole-mounted chargers to streetlights, a cost-effective and innovative approach to expand curbside charging. An electric vehicle is hooked up to a pole-mounted charging station in Los Angeles.

Are public charging stations equally distributed across the United States?

Public charging stations are not equally distributed across the U.S., concentrated more heavily in large population centers and wealthy communities and less so in rural areas and smaller cities. The result is that drivers have disparate experiences, well-served in some areas and starved in others.

Are public charging stations equitable?

However, local governments can play a vital role in making sure public charging stations are equitably distributed and available at costs all residents can afford. In 2022, EV sales in the U.S. doubled their market share to 8%, reaching over 900,000 sold.

Do people of color need EV charging infrastructure?

Many people of color and people living in rural areas, low-income neighborhoods and other underserved communities already face financial hurdles to purchasing electric vehicles (EVs) -- and the lack of access to charging infrastructure will only exacerbate the challenge.
