How long does a CATL EV battery last?

CATL launched its newest battery, the Tianxing Bus version, opening a new era for buses. With "the highest energy density in the bus industry," CATL claims its new EV battery can last 15 years and 1.5 million kilometers(932,000 miles). The world's largest EV battery maker is not slowing down.

Is CATL launching a commercial vehicle battery?

After dominating the passenger car battery market,CATL has intensified its efforts in the commercial vehicle battery market. The company claims that the battery will have an energy density of 175 Wh/kg,setting a new benchmark in the electric bus industry. Tectrans,the commercial vehicle brand of the company,was launched in July.

Is CATL the world's largest battery maker?

Also known as the world's largest power battery maker,CATL had a 37.6 percent global share in the industry between January and July. In July,CATL unveiled its commercial vehicle battery brand,Tectrans,along with two L-series commercial vehicle batteries for the logistics and distribution industry.

Will CATL dominate the global electric vehicle battery market?

Thus,CATL has an opportunity to dominate the global electric vehicle battery market;its market share in China alone constituted almost 50% throughout the first eight months of 2024. The company's batteries are currently used in over 385,000 buses worldwide.

Does CATL's new Tianxing battery improve energy density?

CATL said it improved the energy density by 22% compared to the previous generation. With 175 Wh/kg,CATL claims its new Tianxing Bus battery leads the industry. The new Tianxing battery is designed specifically for buses and can last up to 1.5 million km (932,000 miles) and 15 years.

What is CATL's new target EV battery market?

Its new target is commercial vehicles. According to the latest SNE Research data,CATL accounted for 31.6% of global EV battery sales in the second quarter. China's BYD was second with 14.7% of global battery sales. As of August 2024,CATL held a 37.6% share of the global EV battery market

A Chinese car battery-maker says it is ready to manufacture a product capable of powering a vehicle for 1.2 million miles (two million kilometres) across the course of a 16-year lifespan.

The most notable feature of these new battery cells is their lack of degradation after 1,000 cycles. This has given CATL the confidence to provide a 1.5-million km (932,000 miles) 15-year warranty on the battery pack. Yutong, one of ...

In China, BYD and Contemporary Amperex Technology, another battery giant, are each advertising an EV
