

What is a CATL Qilin battery?

In 2022, CATL introduced its third-generation CTP technology, known as the Qilin Battery, which delivers 13% more power than comparable batteries like Tesla's 4680 battery. The Qilin Battery combines different chemical systems to optimize performance and cost, making it a versatile solution for both EVs and energy storage applications.

What is CATL's new battery technology?

CATL is also advancing sodium-ion battery technology, with its second-generation sodium-ion battery expected to enter the market in 2025. This new battery offers higher energy density, superior low-temperature performance, and enhanced safety, making it suitable for a wide range of applications, including EVs and large-scale energy storage systems.

How many battery manufacturing plants does CATL have?

CATL operates 13 battery manufacturing plants worldwide, with facilities in China, Japan, France, Germany, and Hungary. The company's global presence and strategic partnerships enable it to serve a wide range of markets and industries, solidifying its position as a key player in the global energy transition.

What kind of batteries does CATL offer?

CATL specializes in lithium-ion battery technology, with a strong emphasis on lithium iron phosphate (LFP) batteries, which are known for their safety, longevity, and cost-effectiveness.

Is CATL a leader in solid-state battery technology?

Interestingly, CATL is not the only player in the field of solid-state battery technology. Major automotive and battery companies, such as BYD, Toyota, and Samsung, are also aggressively pushing toward developing all-solid-state batteries.

Can an electric car use a battery swapping station in China?

An electric vehicle has to be equipped with the right technology in order to use a battery swapping station, and not many EV models around the world currently allow for swapping. Conversely, an electric car can use any charging station in China because all use a common plug, and fast-charging technology is reducing the time for a recharge.

After CATL presented its Evogo battery swap solution in 2022 and began setting up the first locations, the company is now setting specific targets for the expansion of its battery swapping network in China. CATL is now aiming ...

XIAMEN, China (AP) -- The world's largest maker of batteries for electric vehicles said Wednesday it will get into battery swapping in China in a big way starting next year.. The idea behind battery swapping is to refuel quickly, ...

BEIJING, Dec. 31 (Xinhua) -- Contemporary Amperex Technology Co., Ltd. (CATL), China's leading battery maker, has unveiled two types of standard swappable batteries and jointly launched such power charging ecology with ...

The world's leading maker of electric vehicle batteries, Chinese firm CATL, posted a 32.9 percent jump in first quarter profit, even as demand for electric vehicles slows.

After completion, it will start large-scale manufacturing of high-quality electric vehicle batteries for BAIC, Xiaomi, LI, and other auto enterprises in Beijing-Tianjin-Hebei ...

The Citi analysts said that CATL expects total battery shipments to the U.S. market, including both direct and indirect sales, to cover a single-digit percentage of total battery sales, ...

The United States' Inflation Reduction Act is pushing U.S. automakers to move away from CATL batteries. In 2024, drivers purchasing new EVs cannot take advantage of the \$7,500 tax credit if the EV has batteries ...

However, their chief scientist Wu Kai said at the China International Battery Fair on April 28, that the firm was targeting small-volume production of all-solid-state batteries by ...

The automaker delivered 2.928 million vehicles in China in 2024, down 10 percent year-on-year. Volkswagen and CATL previously had a partnership. In June 2021, CATL said it received certification from ...

CATL announces 2nd-gen sodium-ion EV battery that works even at -40°C. China's largest battery maker is developing a new sodium-ion battery that can withstand extreme temperatures.

On December 18, 2024, CATL unveiled two standardized battery models, #20 and #25, at the Choco-Swap ecosystem conference held in the coastal city of Xiamen. Jointly launched by CATL in collaboration with nearly 100 partners, ...

BYD subsidiary FinDreams Battery, CATL, CALB, EVE Energy, Gotion High-Tech, and SVOLT have formed a consortium called China All-Solid-State Battery Collaborative Innovation Platform (CASIP) to develop and ...

To this end, CATL has increased its R&D investments in solid-state batteries this year and expanded its team for the programme to over 1,000 people, writes CN EV Post. And: "CATL's current solution can achieve an ...

China's CATL introduced its new Shenxing Plus EV battery, capable of just that. CATL claims the new EV battery is the world's first with 4C ultra-fast charging and +620 miles (1,000 km) CLTC ...

CATL made its debut at the Marintec ChinaMarintec China 2023 was held at the Shanghai New International

Expo Center from December 5 to 8, 2023. During the event, CATL presented a variety of electric vessel battery ...

Volkswagen Group is CATL's customer, along with Tesla, BMW, Nio, Xpeng, Geely, Mercedes-Benz, and others. CATL is the biggest battery supplier in China and worldwide. 2024 battery market share in China. Data: ...

China Petroleum and Chemical Corp (Sinopec) and Contemporary Amperex Technology Co Ltd (CATL), a leading battery maker, have signed a framework agreement on ...

On October 24, 2024, CATL launched Freevoy Super Hybrid Battery, the world's first hybrid vehicle battery to achieve a pure electric range of over 400 kilometers and 4C superfast charging, heralding a new era for high-capacity EREV and ...

: China's CATL, the largest lithium cell manufacturer in the world, has announced its second-generation sodium battery that can operate in temperatures as low as ...

What's New. China's leading electric vehicle battery manufacturer, CATL, has announced plans to significantly expand its battery swapping infrastructure in 2025. The company aims to establish 1,000 ...
