

Who is CATL battery?

The company started in 1999 as a spin-off from Amperex Technology Limited producing batteries for consumer electronics before EVs took off in 2011 in China. CATL was established in 2012 and has grown by leaps and bounds as EV battery demand took off in China, the world leader in EV production and sales, and then spread globally.

Who is CATL EV battery?

CATL was established in 2012 and has grown by leaps and bounds as EV battery demand took off in China, the world leader in EV production and sales, and then spread globally. "China is now the world's largest country for EV sales, with 3.3 million EVs sold in 2021, accounting for around 50% of global sales.

Is CATL a Chinese company?

CATL is also a Chinese company and trades on the Shenzhen Stock Exchange, meaning that access to it is limited for most investors and requires access to China's A shares market, which KraneShares provides through various ETFs.

Does CATL have a long-term future for lithium-ion batteries?

This includes cobalt (73% of the world's supply), nickel (68%), manganese (93%), and 100% of the graphite that lithium-ion batteries use. CATL has taken that one step further, though, and is looking long-term. "The firm also invests in mineral resources and battery recycling to hedge the rising cost of raw materials.

Is CATL a good battery supplier?

It maintains that advantage by being a top battery supplier for major automakers, including Tesla, Volkswagen, BMW and Geely. Analysts at S&P Global Ratings wrote in a recent note that they expect CATL to ramp up capital expenditure over the next two years as it looks to maintain a leading position in the global battery market.

Will CATL's Q3 profit triple as EV demand grows in China?

CATL is currently predicting that its Q3 profit could triple as EV demand continues to grow at a healthy pace in China.
