

Who are CATL batteries?

CATL (Contemporary Amperex Technology Limited) has established itself as a dominant force in the battery industry, leading the way in energy density improvements and the development of new battery chemistries. The company's flagship Shenxing and Qilin batteries are game-changers, featuring enhanced margins and wide adoption within the EV sector.

What is blade battery?

Blade Battery can change the size of the battery pack in the X and Y directions according to the vehicle space, and develop batteries of different specifications. This platform-based battery effectively reduces development costs and time.

Should you buy a BYD blade battery?

There are two main opinions here: One is that the blade battery has no new ideas, is similar to the CTP of the CATL, and is just a marketing gimmick by BYD. The other is that blade batteries solve many of the shortcomings of lithium iron phosphate and are groundbreaking. Next, we will talk about the BYD blade battery. Part 1.

Are CATL's Qilin batteries the same as Tesla & BYD?

CATL's Qilin batteries are in the same segment, with its structural battery design. Electric vehicle battery enthusiast Jordan Giesige of YouTube's The Limiting Factor channel recently conducted a comparison of the advantages and disadvantages of Tesla, BYD, and CATL's next-generation structural packs.

Will CATL & BYD match EV batteries in 2025?

CATL has launched several new EV batteries over the past few years, while BYD introduced the Blade back in 2020. With updated LFP batteries, CATL has been able to drive prices down. BYD looks to match it with the new Blade coming in 2025. BYD and CATL are not the only ones expected to fuel the price war brewing in the EV battery space.

How do BYD blade batteries work?

The structural cooling is placed between each row of prismatic battery cells, and the cells themselves are placed into the pack directly without any modules. BYD Blade batteries use iron-based prismatic cells, though these cells are longer and thinner than those used by CATL.

 ?????????????????????? Shenxing ??? ...

Four key players--CATL, LG Energy Solution, BYD, and Samsung SDI--are leading the charge, each with its

unique approach to advancing EV battery technology. From ...

BYD is the world's second-largest EV battery maker behind CATL, but its new tech could help close the gap. BYD's managing director of Central Asia, Cao Shuang, confirmed during an interview a few...

CATL will ship 6C-capable Qilin 2.0 batteries by the end of the year, while BYD will have its Blade 2.0 batteries with similar charging performance in the second half of 2024.

The battery price war is moving to the upper segment. "CATL slashed the price of VDA-specs LFP batteries from 0.9 yuan/Wh two years ago to 0.35 yuan/Wh, which their sales team is currently promoting," a source told ...

CATL, short for Contemporary Amperex Technology, is the world's top supplier of EV batteries. In China, CATL has a roughly 60% share in lithium-ion NCM batteries. ... The driving force behind BYD's rise in the LFP ...

A source close to BYD told 36Kr that the second generation of BYD's blade battery might be released in the second half of 2024, and that BYD is also developing a 6C battery. ... The core of CATL's Qilin battery ...

CALB has developed a U-shaped battery and holds only 3.7% of the EV market share. CATL is also keeping its eyes on BYD, as the EV manufacturer is creating a wedge in the Chinese EV battery market with its ...

BYD Blade - Y7CR - Battery and Performance Data (On Factory Software 2023.12.100) Scan My Tesla - Battery Tab Scan My Tesla - Performance Run - CATL 6L vs. BYD 7C SOC 92% Zelltemperatur 40°C ...

The BYD vs CATL Model Y versions fight is on, and the first owners of the blade battery pack variant with LFP cells from BYD report better charging performance. The Tesla Model Y with BYD battery ...

Besides CATL and BYD, CALB announced at the end of 2023 that it would start mass producing 46-series large cylindrical batteries supporting a 6C charging rate in the fourth quarter of 2024. The company is also planning to ...

As discovered on a German TFF forum, and previously reported by German publication Teslamag , the new BYD battery cells seem to stay at their peak charging rate for much longer than CATL's LFP ...

High discharge nmc battery 3.7V 72Ah CATL blade battery for Electric Vehicle power startup energy storage. Grade A New NMC Battery Cell, High Quality; 100% inspected and packed very well, 2-Year Warranty; Battery Model. NMC ...
