

When will CATL open a battery factory in Europe?

Chinese market leader CATL has already opened its first battery factory in Europe in 2023. The company is currently working on further scaling up production in Arnstadt, Germany - and is looking for more staff to do so. The ground-breaking ceremony on the former Solarworld site near Erfurt took place in October 2019.

What is CATL's first battery cell production facility outside of China?

CATL's first battery cell production facility outside of China will have an initial capacity of 8 GWh per year, with plans to increase it to 14 GWh over time. The Chinese battery maker broke ground on Germany's first battery cell factory in 2019 at the Erfurter Kreuzindustrial area in Amt Wachsenburg, Thuringia.

Where are CATL batteries made?

The ground-breaking ceremony on the former Solarworld site near Erfurt took place in October 2019. Around three years later, in December 2022, CATL produced the first battery cells at the Arnstadt plant. The factory has officially been in operation since 2023, and the cells produced there are delivered to customers in Germany and Europe.

When will CATL start building its battery cell factory?

CATL plans to start building its planned battery cell factory for electric cars near Erfurt this autumn. According to Matthias Zentgraf, European head of the Chinese company, the ground-breaking ceremony could probably take place in mid or late September.

Will CATL Supply Tesla's new Gigafactory Berlin-Brandenburg?

The new battery cell manufacturing facility in Germany marks a significant milestone for CATL's global footprint expansion. It remains to be seen whether the Thuringia factory will supply Tesla's new Gigafactory Berlin-Brandenburg, located some 330 kilometers northeast.

Will CATL reach 14gwh production capacity by 2022?

In its press release, CATL has said that it will then start "a new stage of capacity expansion on 23 ha green field to achieve 14 GWh production capacity of the battery by 2022." The company says that production lines for both battery cells and modules will be "finalised in this phase of expansion".

ERFURT, Germany, Oct. 18, 2019 / -- A groundbreaking ceremony for the first overseas factory of the world's leading lithium-ion battery maker Contemporary Amperex Technology Co. Limited ...

CATL's first battery cell production facility outside of China will have an initial capacity of 8 GWh per year, with plans to increase it to 14 GWh over time. The Chinese battery maker broke...

Deutsches CATL-Werk nimmt Batterieproduktion auf Contemporary Amperex Technology Co., Limited (CATL) is a global leader in the development and manufacturing of ...

On April 4, Contemporary Amperex Technology Thuringia GmbH (CATT), CATL's first plant outside of China, received the 2nd partial approval for the commissioning of a new plant for battery cell production from the state of ...

CATL has started series production of battery cells in Germany as planned. At the plant in Arnstadt, the first batch of battery cells ran under series conditions from the newly ...

Initially, the headquarters in China wanted to invest around 240 million euros in the Erfurt plant by 2022. At the end of June, however, the board of directors decided to increase the investments to 1.8 billion euros - by a factor ...

The German plant is in Thuringia, providing battery cells for Mercedes-Benz EVs, whereas the Hungary plant is built in Debrecen, where Mercedes-Benz is assembling the upcoming CLA EVs. It's ...

That would be CATL's second battery plant in Europe, as the first one (much smaller) is expected to start production this year in Erfurt, Germany (8 GWh annually initially and 14 GWh annually in ...

The VW Group is also one of the major customers of the CATL production facility at Erfurter Kreuz: the Porsche Macan built in Leipzig, for example, is equipped with battery cells from this plant - and as the Audi Q6 e ...

The world's largest electric vehicle battery manufacturer, Contemporary Amperex Technology Co. Limited (CATL), has received the second partial approval for the commissioning of a new cell plant in ...

CATL already operates an LFP battery plant in Thuringia, Germany, with an annual production capacity of 14 GWh, and it is building another facility in Hungary with a ...

CATL goes giga in Germany. CATL is furthering this strategy in Europe with the opening of its plant in Erfurt, in the eastern state of Thuringia, Germany, which has just gained approval to build batteries and is expected to ...

Samsung's first European EV battery plant opened in 2018, in its former plasma display panel (PDP) factory. It was capable of producing batteries for 50,000 electric vehicles per year. ... China's Contemporary Amperex ...

CATL plans to start building its planned battery cell factory for electric cars near Erfurt this autumn. According to Matthias Zentgraf, European head of the Chinese company, the ground-breaking ceremony could probably ...

BERLIN - Chinese battery giant CATL is set to install six battery cell production lines by the end of 2023 and

hopes to secure approval for 24 gigawatt-hours (GWh of capacity) by June, Matthias ...

Juli-Eine Investitionsvereinbarung zur Errichtung einer Batterieproduktionsst tte und eines R&D-Zentrums f r intelligente Fertigung wird in Erfurt, Th ringen, unterzeichnet September-Contemporary Amperex ...

The CATL battery production in Erfurt will run at full capacity from 2022. Apart from making batteries, they will also install a R&D center for the development of smart ...

CATL is currently investing an even higher amount - \$7.8 billion (EUR1.8 billion) - in a much larger battery plant project in Hungary, which is set for 100 GWh of batteries annually.

CATL factory could be at least as big as Tesla's Gigafactory. The Chinese battery cell manufacturer CATL has updated the plans for its German battery factory in Erfurt, giving it ...

CATL hat mit der Batteriezellen-Produktion in Th ringen begonnen. Der chinesische Hersteller nahm damit das erste Werk au erhalb seines Heimatlands in Betrieb. Zun chst k nnen in der Fabrik j hrlich Batterien mit einer ...
