

Will Ford get LFP batteries?

Ford will receive LFP batteries from CATL's Chinese factories that will go into standard range Mustang Mach-e's later this year and Ford F-150 Lightnings starting in 2024. Ford is communicating that it needs to use two separate battery chemistries for two separate use cases.

Will Ford build an electric car battery plant in Michigan?

Ford Motor Co. recently announced plans to invest \$3.5 billion to build an electric car battery plant in Michigan with Chinese partner Contemporary Amperex Technology Limited (CATL)--the world's number 1 maker of electric-car batteries with 13 factories in Europe and Asia.

Where are Ford batteries produced?

Ford is building a battery plant in Michigan with SK On (previously known as LG Chem). They are also building two other battery plants, in Tennessee and Kentucky, with the same partner.

What is Ford's new lithium-ion battery plant?

The new LFP plant is in addition to Ford's collaborations with LG Energy Solution and South Korea-based SK, including a joint venture for twin lithium-ion battery plants in Tennessee and Kentucky. Those plants are expected to come online in 2025 and 2026.

Why did Ford build LFP batteries in Michigan?

Ford built a battery plant in Michigan to produce LFP batteries in order to obtain significant U.S. battery manufacturing subsidies from the Inflation Reduction Act. This could help Ford hit a goal of 8 percent profit margins on its EV operations by 2026, as the IRA ties a significant share of federal subsidies to domestic production and raw materials content.

When will Ford Motor's new battery plant open?

The plant is expected to open in 2026 and employ about 2,500 people, according to the Detroit automaker. DETROIT - Ford Motor said Monday it will collaborate with a Chinese supplier on a new \$3.5 billion battery plant for electric vehicles in Michigan, despite tensions between the U.S. and China.

Ford will receive LFP batteries from CATL's Chinese factories that will go into standard range Mustang Mach-e's later this year and Ford F-150 Lightnings starting in 2024.

Michigan Republicans have renewed their assault on a planned electric vehicle battery plant in Calhoun County after the Chinese company affiliated with the \$2 billion project ...

(Bloomberg) -- The world's biggest battery maker Contemporary Amperex Technology Co. Ltd. sees little impact from US tariffs and remains bullish about the outlook for ...

Ford has announced it is partnering with China's Contemporary Amperex Technology Limited (CATL) to build a new \$3.5 billion battery plant in Marshall, Michigan, that will produce...

The world's biggest maker of electric-car batteries, China-based Contemporary Amperex Technology Ltd (CATL), will provide technology to Ford Motor's planned \$3.5 billion electric-vehicle (EV) battery factory in Michigan. ...

Regardless, at least for now, the future BlueOval Battery Park Michigan site will use licensed lithium iron-phosphate battery (LFP) technology from CATL to build those same units when it comes online in 2026, and Ford ...

CN EV News reported the developments after interviewing a CATL spokesperson. As for the new sodium-ion battery, CATL was one of the first manufacturers to present its own SIB in mid-2021. The first generation had an ...

Regardless, at least for now, the future BlueOval Battery Park Michigan site will use licensed lithium iron-phosphate battery (LFP) technology from CATL to build those same ...

In addition to supplying LFP-based CTP batteries to Ford, CATL intends to actively cooperate with Ford with respect to other battery technologies. The elevated global strategic ...

The chairs of two U.S. House committees asked the Biden administration to investigate four Chinese companies they say are involved in Ford Motor's planned Michigan battery plant, according to a ...

Ford confirmed it will collaborate with China-based Contemporary Amperex Technology Co. Ltd (CATL), the world's largest battery company. The Chinese company, which is not a government-owned ...

The future Ford BlueOval Battery Park Michigan plant is currently under construction in the town of Marshall, where it will begin producing lithium-iron phosphate (LFP) ...

CATL, based in Fujian, China, supplies batteries to global automakers in China and abroad including Tesla, Ford, Volkswagen and BMW. The US blacklisting follows a longstanding policy under the ...

Ford's announcement that it is investing \$3.5 billion in a new EV battery cell plant in Michigan using technology from China's CATL has caught the attention of Republican senators and...

The plant's leadership team is forming now, headed by Scott Davis, CEO of BlueOval Battery Michigan LLC, a wholly owned Ford subsidiary. Davis is a 17-year resident ...

While the BlueOval Battery Park is owned entirely by Ford, it will produce batteries based on lithium-ion phosphate (LFP) technology from Chinese battery giant CATL. CATL Qilin Li-ion battery ...

Chinese components manufacturer CATL currently provides EV batteries to automakers like Ford and Tesla, but now the U.S. government is warning against relying on ...

Among the new list is Contemporary Amperex Technology Company, Limited (CATL). The company supplies both Ford and Tesla with batteries and battery technology, with the former using them in the ...

CATL batteries are displayed during an expo in Xiamen, Fujian province. [Photo provided to China Daily]
Chinese battery leader Contemporary Amperex Technology Co Ltd ...

Bloomberg is out today with the story of how the Ford/CATL battery factory deal got done. It took two years and many trips back and forth across the Pacific. Even now, there are politicians who ...
