

How do you charge an EV at a gas station?

While charging an EV is different from refueling your car at a gas station, expanding infrastructure means that EV charging has never been easier. The basic steps of recharging your EV at a public station are: Pull the car up to the charger. Turn the car off. Plug in a fuel-supply cord.

How do I find electric vehicle charging stations?

Google Maps also has an Electric Vehicle Charging category you can select. Each app shows the number, type, speed, and sometimes photos of each charging station location. Some apps have live data about which stations are available at that moment. Have a backup plan.

Are there public charging stations for electric cars?

Yes, there are three levels of public charging stations for electric vehicles. All vehicles can be connected to either a Level 1 or Level 2 charging station, which have the same charging capacity as those you can install at home.

Where are public charging stations typically located?

Public charging stations are often located near businesses such as restaurants, shopping centers, parking lots and other public places. Public charging enables EV drivers to charge their electric cars when they are on journeys that exceed the battery's remaining range.

How do electric cars charge on the go?

Charging on the go is further simplified by way of many electric cars' in-dash navigation systems, which will typically suggest charging locations to stop at along your route should your EV need a charge in order to reach the final destination.

How fast does a Level 2 charger charge an electric car?

A Level 2 charger can charge an electric car 5 to 7 times faster than a Level 1 charger. So you'll be able to maximize the use of your EV and minimize the number of charging sessions at public charging stations. Charging at home is usually done in the evening and overnight.
