

How does a cinch tent work?

LED lights line the ceiling of the tent, serving to illuminate your living area at the touch of a button on your smartphone. The setup sparkles, glints, and provides for 365 colors. The Cinch also provides for solar power mounting and climate control -- say goodbye to those sticky mornings.

Why should you buy a cinch solar panel?

The Cinch also provides for solar power mounting and climate control -- say goodbye to those sticky mornings. The solar panels pull in 21 watts of power and are strong enough to charge your USB gadgets straight from the sun, including innovative technology that allows the panel to manage environmental conditions and deliver the best charge.

How much does a cinch tent cost?

The Cinch comes in two, three and four person sizes. Prices range from \$330 to \$350 USD. Whether you're a weekend adventurer or stick to backyard outings, these seven tents and outdoor shelters will make "roughing it" a comfy experience.

Are cinch tents waterproof?

The tent has two entrances and there are dual screen doors throughout. The material provides for 100 percent waterproofing with double-taped seams and a 4000HH fabric outer layer. The product includes super flex fiber glass poles, door mats, and extra pegs and guys for total wind resistance. What makes the Cinch so smart?

How does a solar tent work?

The rooftop ports store the solar power inside the tent, keeping it dry and easily accessible. The portable power pack offers 13,000mAh with fast-charging, two regular USB ports, and even a USB type-C port. The climate control canopy stretches over the tent, serving for a cooler and darker interior.
