

Are there incentives to invest in solar in Colorado?

There are several incentives in Colorado that make investing in solar and renewable energy cost-effective. Colorado residents and business owners who install solar panels are eligible for rebates and tax credits that can help reduce the cost of going solar.

Does Colorado have a solar tax credit?

Colorado also offers solar incentives such as tax exemptions and rebates for home solar systems, helping to lower the cost of going solar. The solar Investment Tax Credit (ITC) allows homeowners to claim 30% of their total solar system cost as a federal tax credit, which you can use to lower your federal income tax burden.

Are solar panels a good investment in Colorado?

The average Colorado solar shopper will save \$4,350 on solar panels with rebates and incentives. Solar panels are a great investment for Colorado residents, thanks to a rock-solid net metering policy and lots of local and utility level incentives--not to mention the big federal clean energy tax credit.

Who can benefit from the Colorado solar rebate?

The Colorado solar rebate is available for community solar projects, nonprofits and commercial solar customers, not just residential homeowners. With an average system size of 7.5 kW, that rebate could total as much as \$15,000, not including the ongoing credits for solar production.

Is Colorado a good state for solar?

Colorado is a sunny state with a handful of solar incentives, including the federal tax credit, property and sales tax exemptions, and net metering programs. You may also qualify for solar grant programs or rebates based on your location. Plus, you can combine state incentives with the federal tax credit to save on your solar project.

How much does a solar system cost in Colorado?

The Residential Clean Energy Credit, formerly known as the federal investment tax credit (ITC), can reduce your solar panel system's cost by 30%. Your entire system qualifies for this incentive, including equipment, labor, permitting, and sales tax. The average cost for a 5 kW solar panel system is around \$14,500 in Colorado.
