

What is a commercial solar lease?

Commercial solar leases often fall into one of the following industries: Solar panels can be installed on the rooftops of company buildings, or the surrounding parking lots. There are a few benefits to either location, as outlined below.

Do you need a commercial solar lease?

Any organization or company that has a large rooftop or parking lot has a lot to benefit from going solar, whether it is owned or a solar lease. Commercial solar leases often fall into one of the following industries: Solar panels can be installed on the rooftops of company buildings, or the surrounding parking lots.

What are the pros and cons of commercial solar leases?

This article will guide you through the benefits of commercial solar leases, including an outline of the pros and cons of installing solar on commercial rooftops and parking lots. The pros of commercial solar leases range from financial, avoiding future pain, to social responsibility. First off, it is a good, strategic financial decision.

Do commercial solar leases increase property value?

A solar array on a commercial property can increase property value for resale. In many jurisdictions, it also ensures compliance with green building standards, potentially reducing the need for other costly measures.

How does a solar lease work?

Usually, rooftop or parking lots smaller than 25,000 square feet will not support the investment, unless they are part of a series of projects grouped together. The solar lease process works the same as any other solar development: the business owners receive a free assessment of the rooftop or parking lot, where the solar project is best suited.

Can I lease a solar roof or carport?

You can lease your property for a solar rooftop or carport to create an additional revenue stream. Installing a solar project on your property may qualify you for tax credits and other incentives that can be claimed on federal income taxes. Leasing your property for a solar project is what we offer in a Commercial Solar Lease. We have the engineers to understand a site.
