

Is Toowoomba suitable for solar energy investment?

Toowoomba has consistently been among Australia's top ten postcodes for PV uptake, making it a good place to invest in solar energy. The Toowoomba Regional Council has also been supportive of solar energy, approving the construction of a solar farm in 2015, which could potentially be as large as 2,000 megawatts.

How many solar systems are available in Toowoomba?

Solar Union offers three standard configurations for solar systems in Toowoomba: a small 5kW system, a medium-sized 6.6kW system, and a larger 10kW solution. All of our solar Toowoomba solutions utilise industry leading tier-1 solar panels and advanced inverters for maximum efficiency and power conversion.

Who performs solar panel installations in Toowoomba?

Accredited installers from Brisbane also perform solar panel installations in Toowoomba. With the constant increase in demand for solar panel systems, the number of solar installers in Toowoomba has also seen an increase over the last few years. If you are searching for solar panel installers in Toowoomba, your search ends at Smart House Solar.

Can solar panels reduce electricity costs in Toowoomba?

Solar panel systems prove to be a very effective option to curb high electricity costs. People in Toowoomba are taking advantage of solar panels to bring down their budget.
