

Does Consumer Reports review solar companies or solar panels?

Unfortunately, Consumer Reports doesn't review solar companies or solar panels. If you are inspired to investigate solar power systems, you'll need trustworthy sources to help you make informed decisions.

Are solar panels a good idea?

They stated that there were still many other incentives, and solar remained "a good idea." Consumer Reports is an authoritative source that Americans trust and their endorsement of solar panels will help sway many homeowners who have been sitting on the fence. Unfortunately, Consumer Reports doesn't review solar companies or solar panels.

How are solar panels rated?

Solar panels are rated by their cost per watt to show how much energy you get for each dollar you spend. This is similar to how car manufacturers use miles per gallon (MPG) to show fuel efficiency.

How popular is solar energy?

Solar energy is currently witnessing rapid adoption by homeowners. In fact, according to peak solar body SEIA, more than half a million U.S. homes installed solar panels in 2021 alone - an all-time record.

Is solar power right for You?

There's plenty to consider before you decide whether solar power is right for you. When you use a solar panel system -- also called a photovoltaic or PV system -- to produce power for your home, you won't have to buy as much electricity from the utility company, and you get the benefits of renewable energy.

Does CR endorse solar panels?

CR endorses solar panels but doesn't offer solar reviews. Here are the best consumer websites to research solar panels and solar companies.
