

# Container homes with wind and solar power

Can a container home be energy efficient?

Apart from solar power, there are plenty of other ways that a container home can be made to be energy efficient. For example, the usage of LED bulbs consumes less energy than filament bulbs, and they're known to last significantly longer than their aged counterparts.

How does solar PV work?

Solar PV based on 168 panels of 370 W is deployed from within the container and integrated with the power generated from the wind, providing the maximum generation from the natural energy resources available at the location.

What is a wind/solar hybrid?

The wind/solar hybrid configuration optimizes production in the daily solar cycle and maximizes power generation on a 24-hour cycle.
