

How much does it cost to install a solar panel?

(Mar 2025) Solar panels generate "free" electricity, but installing a system still costs money. A typical 8-kilowatt (kW) solar panel system costs \$22,712 before considering any financial incentives. Your energy needs determine the system size you need, which affects the overall price of your solar panel installation.

How much does a solar system cost?

Leasing a system is cheaper upfront, but you won't get the federal tax credit. The average 5-kilowatt (kW) solar panel system is \$14,210 before considering any financial incentives. However, a typical American household needs a system closer to 10 kW to adequately power their home, which costs \$28,241 in 2024.

How much does a solar panel mount cost?

The selection of the mounting system for your solar panels can influence the cost per panel, ranging from \$15 to \$750. Here's an overview of the various mount types: Adjustable Mount: Adjustable solar panel mounts provide the flexibility to raise or lower panels for better sunlight exposure. These mounts typically range from \$30 to \$250 per panel.

What is the cost of solar panels per square foot?

On average, solar panels cost \$8.77 per square foot of living space, after factoring in the 30% tax credit. However, the cost per square foot varies based on the size of the home. For example, the post-tax credit cost of solar panels for a 2,500-square-foot home is around \$20,000 for a rate of \$7.96 per square foot.

How much does a 5 kilowatt solar system cost?

The average 5-kilowatt (kW) solar panel system is \$14,210 before considering any financial incentives. However, a typical American household needs a system closer to 10 kW to adequately power their home, which costs \$28,241 in 2024. That price effectively drops to \$19,873 after considering the full federal solar tax credit.

How much does a solar system cost for a 3,000 square foot home?

The average pre-incentive cost of a solar system for a 3,000 square foot home was \$30,100 based on thousands of sales conducted on solar.com in 2022. The number of panels in these systems depends on the price point from the installer and power rating of each panel. The table below shows a few common scenarios for a 3,000 square foot home.

52 rows Solar panels generate "free" electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs...
