

How much does it cost to install a solar panel?

(Mar 2025) Solar panels generate "free" electricity, but installing a system still costs money. A typical 8-kilowatt (kW) solar panel system costs \$22,712 before considering any financial incentives. Your energy needs determine the system size you need, which affects the overall price of your solar panel installation.

How much does a solar system cost?

Leasing a system is cheaper upfront, but you won't get the federal tax credit. The average 5-kilowatt (kW) solar panel system is \$14,210 before considering any financial incentives. However, a typical American household needs a system closer to 10 kW to adequately power their home, which costs \$28,241 in 2024.

How much does solar energy cost per watt?

The cost per watt is what you pay for each unit of power of your solar energy system. Think of it a little like "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes. As of publishing, the average cost per watt is \$2.84.

Is installing solar panels worth it?

To determine if solar panels are worth it for your home, consider factors such as local incentives and policies, your electric bill, and how you finance the system. After accounting for the federal solar tax credit and local incentives, the net cost may be around \$21,000.

What is the cost to install a solar battery?

Installing a system that can store unused energy can increase the cost as well. A good solar battery can cost over \$10,000 before federal tax incentives. For example, for a quote that we requested from Tesla, one Tesla Powerwall 3 with installation can run over \$16,500.

How much does a 5 kilowatt solar system cost?

The average 5-kilowatt (kW) solar panel system is \$14,210 before considering any financial incentives. However, a typical American household needs a system closer to 10 kW to adequately power their home, which costs \$28,241 in 2024. That price effectively drops to \$19,873 after considering the full federal solar tax credit.

There are a number of steps to follow when planning to power your home with solar energy. After choosing which option is best for you to use solar (see step 3), follow the steps afterward that apply to you. ... The purchase ...
