

Cost of commercial electric car charging station

What is the cost of an EV charging station?

When considering the installation of an EV charging station, a budget of \$1,000 to \$5,000 per Level 2 charging station should suffice. This budget includes the charger itself, alongside the necessary electrical and construction work.

How much does it cost to install electric car charging stations?

Under the Workplace Electric Vehicle Charging Incentive Program, workplaces qualify for 80% of the cost to purchase and install electric vehicle charging stations, up to a maximum of \$7,500 per station. This program is in addition to the electric vehicle purchase and home charging incentive programs, making Ontario one of the best and most affordable places in the world to drive electric.

How much does an electric vehicle charger cost?

Models with Wi-Fi and a wall-mounted station cost from \$500 to \$800. The electric vehicle charger should preferably be installed on the same side of the vehicle's charge port and as close as possible. Place the EV charger within 15 to 20 feet of the vehicle's charge port. EV cords can be as long as 25 feet, with 18 to 20 feet being the norm.

How does an EV charging contractor operate?

An EV charging contractor installs your charging stations and covers the costs. They then collect the revenue generated from drivers charging their EVs. Alternatively, the contractor may split both the costs and revenue with you.

Are DC fast chargers a good choice for commercial EV charging?

For commercial properties with medium- or heavy-duty EV fleets, DC fast chargers are a good choice to meet their EV charging needs. Level 1 chargers are not suitable for commercial facilities as they are too slow and can overload electrical circuits.

What is the cost of a Level 2 charging station?

The cost of a Level 2 charging station generally ranges from \$1,000 to \$5,000. This budget includes the charger itself, alongside the necessary electrical and construction work. The final expense depends on variables such as the chosen charger type and the extent of electrical modifications required.
